

Laboratory Management Webinar Series

FINANCIAL MANAGEMENT

We are pleased to host the Laboratory Management webinar series. It is a four -part webinar series focusing on the core competencies and skills required for laboratory management.

DESCRIPTION:

This is the third webinar of the series. It will focus on the concepts, tools and processes related to Laboratory Management. It will be an interactive session discussing the elements of a laboratory budget, budgeting processes and various types of cost analyses conducted with examples. The webinar will review the financial audit process and discuss the concept of financial sustainability.

LEARNING OBJECTIVES :

After completing the webinar, participants will be able to:

- Classify various types of budgets, budgeting processes and costs
- Describe how internal controls are used for budget monitoring and evaluation
- Understand the purpose and features of a financial audit
- Explain the importance of a financial sustainability plan

TARGET AUDIENCE:

This webinar will be informational and beneficial to all the laboratory professionals
